

CryBaby (CRYB) — The Token of Joyful Sadness

1. What is CryBaby?

CryBaby is a Solana meme token inspired by Pop Mart's iconic symbol of emotional contradiction. Whether you're feeling euphoric or existential, CryBaby captures the essence of being human in the most degenerate corners of Web3. \$CRYB is not about utility — it's about vibes, feelings, and crying all the way to the meme bank.

2. Vision

CryBaby exists to build an emotionally fluent meme community on Solana. This isn't about yield farming or Layer-3 rollups. It's about building a shared identity that celebrates the absurdity of markets, feelings, and ourselves.

We are here to:

- Cry happy tears together
 - Embrace our inner softie
 - Laugh through the chaos
-

3. Tokenomics

Allocation	% of Supply
Liquidity Pool (Raydium)	90%
Community Airdrops	5%
Dev Wallet (Future Growth)	5%
Mint Authority	Burned
Total Supply	Fixed

****No taxes. No shady mechanics. Just pure, decentralized crying.***

4. How to Buy

1. Add CRYB to your Solana wallet (e.g., Phantom)
2. Head to Raydium or Jupiter
3. Swap SOL for CRYB

4. Cry in happiness or regret — both are valid emotions
-
